

INTERNAL GRANT STAFF JOURNEY MAP CYCLE FLOW

Journey Phases	Grant Setup	Grant Announcement	Communication	Application Submission	Eligibility Check	Funding Decision	Grant Distribution	Impact Reporting
Jobs to be Done	1. Define grant goals and eligibility 2. Prepare guidelines and forms	1. Publish grant details 2. Promote to community and partners	1. Answer applicant questions 2. Provide guidance before submission	1. Receive and log applications 2. Confirm submission	1. Review eligibility criteria 2. Verify documents and budgets	1. Review and score applications 2. Finalize funding decisions	1. Prepare agreements 2. Process payments	1. Collect reports from recipients 2. Track project outcomes
Context & Touchpoints	1. Internal meetings 2. Word docs, SharePoint, email	1. City website 2. Email, social media, PDFs	1. Email inbox 2. Phone calls 3. FAQ documents	1. Email 2. PDF forms 3. Excel tracker	1. Excel sheets 2. Email follow-ups	1. Review meetings 2. Scoring sheets	1. Email 2. PDF agreements 3. Financial system	1. Email 2. Reports 3. Spreadsheets
Gains	1. Clear program structure 2. Aligned expectations across teams	1. Awareness of funding opportunities 2. Applicants start preparing early	1. Applicants get support 2. Better quality submissions	1. Applications are collected 2. Staff track submission volume	1. Only valid applications move forward 2. Issues are flagged early	1. Fair and structured decisions 2. Clear evaluation process	1. Funds are released 2. Projects can begin	1. Evidence of community impact 2. Accountability
Pains	1. Each department works separately 2. No shared templates or standards	1. Information is spread across channels 2. Some groups miss announcements	1. Same questions answered repeatedly 2. No shared communication record	1. Applications come in different formats 2. No automatic confirmation	1. Manual checks take time 2. Missing information causes delays	1. Time spent preparing materials 2. Data handled manually	1. Signature process is slow 2. No clear tracking of agreements	1. Reports are inconsistent 2. Data is not centralized
UX Insight	Programs are built differently each time, causing inconsistency.	There is no single place where all information is clearly shared.	Important information is not captured or reused across the team.	Submission is not standardized, creating extra work for staff.	Most issues could be avoided with better form validation.	Staff spend more time preparing data than evaluating it.	Manual paperwork slows down fund distribution.	Impact data is collected but not fully used or analyzed.
Emotion	Neutral	Slightly Positive	Neutral	Slightly Positive	Frustrated	Neutral	Neutral	Frustrated
